WhatNext: Engineering the Future of Mobility Through Vision and Excellence

The automotive industry is undergoing its most radical transformation in a century. WhatNext stands at the forefront of this revolution — combining strategic foresight, deep industry networks, and cutting-edge innovation to shape the future of mobility. This document outlines the project development vision, core mission, and the motorsports heritage that drives our commitment to excellence.

PROJECT DEVELOPMENT PHASE

MOBILITY INNOVATION

Made with GAMMA

The Exponential Transformation Ecosystem: Redefining Mobility's Horizon

WhatNext operates as more than a consultancy — it is a dynamic transformation engine built to accelerate growth and innovation across the mobility sector. By integrating intellectual capital, expansive networks, and cutting-edge resources, WhatNext delivers a unique "Transformation-As-A-Service" model that empowers organizations to lead rather than follow.

Transformation-As-A-Service

WhatNext's core mission is to seamlessly integrate intellectual capital, expansive networks, and cutting-edge resources for unparalleled future growth in the mobility sector. This model enables organizations to access world-class expertise on demand, accelerating their transformation journey without the overhead of building capabilities from scratch.

Anticipate and Disrupt

In the rapidly evolving automotive industry, waiting for external forces to drive change is a recipe for obsolescence. WhatNext encourages businesses to proactively embrace change and self-disrupt — cultivating a forward-thinking mindset that identifies emerging opportunities before competitors even recognize the shift.

Outside-In Thinking & On-Demand Resources

Breakthrough innovation rarely happens in isolation. WhatNext unearths vital resources, skills, and know-how from external ecosystems to bridge technology gaps and conceptualize groundbreaking mobility solutions. This outside-in approach brings fresh perspectives and proven methodologies into the heart of your organization.

Bridging the Technology Gap

By tapping into global digital technology ecosystems, WhatNext accelerates innovation and digitizes business processes — paving the way for smarter, faster, and more efficient mobility. From AI-driven analytics to connected vehicle platforms, we connect organizations with the technologies that will define the next era of transportation.

Key Insight: Organizations that self-disrupt before external forces compel them to do so consistently outperform those that react to change. WhatNext's ecosystem approach ensures you are always ahead of the curve.

Vizion Motorsports: A Testament to Future Mobility in Action

Vizion Motorsports represents the living embodiment of WhatNext's philosophy — a bold commitment to pushing boundaries, embracing advanced engineering, and competing at the highest levels of motorsports. The team's journey from NextGen to Vizion reflects an unwavering dedication to innovation and performance excellence.

From NextGen to Vizion

Vizion Motorsports, formerly NextGen Motorsports, actively competed in NASCAR's Truck Series and ARCA Menards Series between 2017 and 2019, showcasing a deep commitment to the competitive edge of automotive technology. The rebrand to Vizion signaled an evolved vision — one aligned with the broader mission of shaping the future of mobility through performance, precision, and purpose.

Pioneering Spirit Across Series

The team's participation across multiple NASCAR series — including the Truck Series, ARCA Menards Series, and the Xfinity Series — demonstrates a dedication to pushing boundaries and exploring new frontiers in motorsports. This multi-series presence reflects WhatNext's innovative ethos: never settle, always advance, and embrace every opportunity to learn and improve.

Future Aspirations

While the team's active competition phase concluded in 2019, its history represents a foundational step in embracing advanced automotive engineering and performance. The lessons learned on the track — in data analysis, vehicle dynamics, and team coordination — directly inform WhatNext's forward-thinking vision for the future of mobility.

1 — 2017

NextGen Motorsports enters NASCAR Truck Series and ARCA Menards Series competition

2 — 2018

Expanded participation across multiple NASCAR series with growing technical capabilities

3 — 2019

Final active competition season — legacy of innovation and performance established

4 — Future

Vizion Motorsports legacy fuels WhatNext's broader mobility innovation mission
